

SAVED FROM CATARRH OF LUNGS SO COMMON IN WINTER BY TAKING PE-RU-NA.

Sore Throat Develops Into Bronchitis.
Mrs. Addie Harding, 121 W. Brighton Ave., Syracuse, N. Y., writes: "I have been a user of Peru-na for the past twelve years. With me it is a sure preventive of colds and many other ills."

Mrs. Addie Harding.

"Two or three times a year I am troubled with my throat, a kind of raw feeling, turning to bronchitis. I have had the services of my physician in each case. Two years ago, when I felt a spell coming I tried Peru-na to check it, and to my delight was not troubled with the smothered and choking feeling and never have been since. I can check it every time with Peru-na."

Mrs. Virginia Cavanaugh.
Chronic Catarrh of Throat and Lungs

Mrs. Virginia Cavanaugh, room 32, Cambridge Block, Portland, Ore., writes: "I was a sufferer with catarrh of the throat and lungs for a long time before Peru-na was recommended to me. I gave it a trial, although I thought at the time it would be just like other medicines and do me no good. I was pleased to find that my improvement began in less than two weeks and continued until I was entirely well. I gained nearly 15 pounds, have a splendid appetite and am grateful for what your medicine has done for me."

Low Rates to the Pacific Coast

OHIO'S WEEKLY OLIO.

BRIEF COMPILATION OF LATE STATE NEWS.

An Interesting Summary of the More Important Doings of Our Neighbors—Weddings and Deaths—Crimes, Casualties and General Buckeye News Notes.

Buckeye News in Brief.

Henry German, aged 74, of Sandusky, was killed by a tree that he was cutting down falling upon him.

Mary Ann Baxter, aged 80, while alone in her home at Cadiz, was burned to death by her clothing catching fire from an open grate.

The home of Levi Weaver, near Beaver Dam, Allen county, with all of its contents, was destroyed by fire. Loss, \$2,500; no insurance.

Harmon Zuber, aged 25, was crushed to death between two cars on which he was working in the Solar refinery of the Standard Oil Company at Lima.

Frank Kern, 38, was found dead near Chillicothe. He was subject to epileptic attacks, and fell in a snowdrift, face downward, and smothered to death.

In Ohio during last year the gasoline stove fired 157 buildings, scarred more than 200 persons and burned thirty to death, according to the report of the state fire marshal.

Andrew Carnegie has signified his intention to President John M. Davis, to donate \$25,000 to Rio Grande College, a Baptist theological school at Rio Grande, Gallia county.

Mrs. Lillie Byrket, 118 years old, a gypsy woman, died in the Memorial hospital at Piqua from burns. Her clothing caught at a campfire, every stitch being burned from her body.

Robbers dynamited the postoffice safe at West Carrollton and secured about \$100 in money and stamps. The office was wrecked. The explosion awoke the entire town, but the robbers escaped in a buggy.

In an appropriation bill before congress there is an item of \$90,000 for a public building to be erected in Elyria. The city council has decided to offer the government a free sight for the postoffice building.

Fire of unknown origin destroyed the business block owned by former Judge P. M. Smith, at Wellsville, causing a loss estimated at \$25,000. The plant of the Wellsville Daily Union was partially destroyed.

There are rumors of a pending sensation in the Butler county infirmary board. The county commissioners refused to approve their last semi-annual report, and ordered the men to appear in person at Hamilton to answer questions as to many items.

Seven horses, two cows, seventy-five chickens, three buggies and farm implements and a large quantity of feed were consumed in a fire that destroyed a barn on the farm of John Tate, east of Marion. The loss is heavy, with no insurance.

The dead body of Albert Blackwell, a bartender at Cincinnati, was found in his room over the saloon where he was employed. The police say he committed suicide following a quarrel with his sweetheart, but some of his friends claim he was murdered. Blackwell's home is in Ironton.

William W. Ross, aged 72 years, superintendent of the Fremont public schools since 1864, and a prominent educator, died suddenly at Fremont. Professor Ross was well known as a lecturer and was the author of numerous works on educational, tariff and economical questions. Heart disease was the cause of death.

The decomposed body of Charles Spicer, 25, of Trinway, was found floating in Watkomaka creek, near Dresden. Last November Spicer was accused of forgery. Officers went to arrest him, but he saw them approaching and, running to the creek, disappeared in a thicket of willows. The identification was made certain by his clothing.

An incoming passenger train from Chicago on the Big Four was derailed by the tower operator at Riverside, four miles from Cincinnati, to prevent a collision with a freight. The engine and mail car were thrown from the track. The passengers suffered a severe shaking up. Engineer Ben Mitter and Fireman Klesiek were painfully hurt.

By the collapse of the upper floor of one of the buildings of the big cabinet works of Theodore Kuntz, Cleveland, one man was killed, one fatally injured and ten others had a miraculous escape from death. The man killed is Joseph Antell, who was caught beneath the debris and crushed to death. The weight of lumber on the upper floor is supposed to have caused the accident.

A heavy steel car loaded with coal, broke loose from a cable while coming down a steep incline at the Laughlin tin plant in Martins Ferry, and tumbling on the roof of the mill crashed through to the ground below, catching five men who were loading iron. John Kremo was instantly killed, John Wersa suffered a fracture of the skull and a broken arm, Mike Som's head was cracked open and John Dedrist's right arm was broken. Two other foreigners suffered slight injuries.

After thirty years of litigation between Emory Lockhart and his brother, James Lockhart, of Bellefontaine, during which time their controversy has gone through all the courts of Logan county, district and state, and finally to the Federal Bankruptcy Court, Emory Lockhart has finally paid over to his brother James the sum of \$15,800. They were in business many years ago, and when they dissolved partnership could not agree as to the adjustment. The court costs in the cases paid in this final settlement amounted to \$3,513, but this is only a share of the costs incurred, to say nothing of the attorneys fees involved.

Wittenberg College, Springfield, has received for theological and art purposes a gift of \$125,000 in farm lands from Dr. H. W. Hanna of Baltimore, Md., one of the most prominent men in the Lutheran church. He gave the college the Hanna Divinity hall.

Fire at the residence of Elmer Conkerill, fifteen miles from Washington C. H., fatally burned Miss Minnie Allison and entirely destroyed the house with a loss estimated at \$8,000. Flames from an open grate caught the dress of Miss Allison and as she ran through the house the curtains were ignited from her clothing.

CLIPPING THE HORSE.

RECOMMENDED BY LEADING VETERINARIANS.

Clipping Improves the Health of the Horse, Makes Him Feel Better, Work Better, and Increases His Value.

"A horse is a valuable asset, and should receive the best care possible. He should be well fed, comfortably stabled, carefully groomed and clipped in the early spring. If he receives these attentions he will work well and improve in value. A horse lives under artificial conditions. In his wild state he required none of these attentions, for he was able to look out for himself. The domesticated animal, being worked under conditions that are in themselves artificial, must be kept in condition for such work.

The clipping of a horse in the early spring is now conceded by all the leading veterinarians to be as essential to a horse's well being as shoeing him or giving him a comfortable bed to lie on. Farmers in England and France have been clipping their horses for many years, and American farmers are not slow to realize its advantages. A clipped horse dries out rapidly after a hard day's work, and will rest comfortably and be refreshed for the work the following day. An unclipped horse is liable to catch the heaves, pneumonia and all sorts of colds, rheumatism, etc. More especially is this so in the early spring, when his hair is long and he is "soft." If worked hard he will perspire freely and the moisture will be held by his long hair, and the food that should go to nourish him will be used to replenish the heat that is being constantly taken from his body by the mass of cold wet hair. If clipped, the perspiration will evaporate almost as soon as secreted, and when put in the stable he rests comfortably and his food does him good.

Some years ago a Buffalo street car company tested the value of clipping in the following manner: They owned 500 horses, and 250 of these were clipped early in the spring and 250 were not clipped. A careful record was kept of results, and it was found that of the 250 unclipped horses 153 were afflicted with coughs and pneumonia, while of the 250 clipped not one case of sickness was reported.

A man would not expect to enjoy very good health if he did hard manual work clothed with heavy underwear, a heavy suit and a fur overcoat, and after perspiring freely, as he naturally would, go to sleep without removing same. It is just as ridiculous to expect a horse to be in perfect health if worked under the same conditions.

If you would get the best returns from your investment in your horse, treat him right, and be sure and clip him in the early spring.

A first-class horse-clipping machine can be bought at nearly any hardware store for less than \$7.00.—Horse Review.

Everything Orderly.

"What's the excitement down there at the corner?" asked the stranger. "There ain't no excitement, mister," said one of the bystanders. "A feller with a camera took a snapshot of a wedding party as they were comin' out of church, and the bridegroom is kickin' him around the block."

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional means. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.

How to cure Lameness, Stiff Joints, Rheumatism, Lumbago and Sciatica in a few hours. Apply Dr. Bayer's Penetrating Oil. This is no mere assertion, but a fact. 25c a bottle.

League for Upright Writing.

In Paris a "League for Upright Writing" has been formed, and it takes a phrase from Georges Sand as its motto: "Upright writing on horizontal paper with the body held straight." The league crusades against the old English style of writing slanting and angular, which, it says, is no longer really taught in England or America. Slanting writing is said to cause scollis, as well as short sight and many other optical troubles.

WHO SHE WAS

SKETCH OF THE LIFE OF LYDIA E. PINKHAM

And a True Story of How the Vegetable Compound Had Its Birth and How the "Panic of '73" Caused it to be Offered for Public Sale in Drug Stores.

This remarkable woman, whose maiden name was Estes, was born in Lynn, Mass., February 9th, 1819, coming from a good old Quaker family. For some years she taught school, and became known as a woman of an alert

restore the family fortune. They argued that the medicine which was so good for their woman friends and neighbors was equally good for the women of the whole world.

and investigating mind, an earnest seeker after knowledge, and above all, possessed of a wonderfully sympathetic nature.

In 1843 she married Isaac Pinkham, a builder and real estate operator, and their early married life was marked by prosperity and happiness. They had four children, three sons and a daughter.

In those good old fashioned days it was common for mothers to make their own home medicines from roots and herbs, nature's own remedies—calling in a physician only in specially urgent cases. By tradition and experience many of them gained a wonderful knowledge of the curative properties of the various roots and herbs.

Mrs. Pinkham took a great interest in the study of roots and herbs, their characteristics and power over disease. She maintained that just as nature so bountifully provides in the harvest fields and orchards vegetable foods of all kinds; so, if we but take the pains to find them, in the roots and herbs of the field there are remedies expressly designed to cure the various ills and weaknesses of the body, and it was her pleasure to search these out, and prepare simple and effective medicines for her own family and friends.

Chief of these was a rare combination of the choicest medicinal roots and herbs found best adapted for the cure of the ills and weaknesses peculiar to the female sex, and Lydia E. Pinkham's friends and neighbors learned that her compound relieved and cured, and it became quite popular among them.

All this so far was done freely, without money and without price, as a labor of love.

But in 1873 the financial crisis struck Lynn. Its length and severity were too much for the large real estate interests of the Pinkham family, as this class of business suffered most from fearful depression, so when the Centennial year dawned it found their property swept away. Some other source of income had to be found.

At this point Lydia E. Pinkham's Vegetable Compound was made known to the world.

The three sons and the daughter, with their mother, combined forces to

The Pinkhams had no money, and little credit. Their first laboratory was the kitchen, where roots and herbs were steeped on the stove, gradually filling a gross of bottles. Then came the question of selling it, for always before they had given it away freely. They hired a job printer to run off some pamphlets setting forth the merits of the medicine, now called Lydia E. Pinkham's Vegetable Compound, and these were distributed by the Pinkham sons in Boston, New York, and Brooklyn.

The wonderful curative properties of the medicine were, to a great extent, self-advertising, for whoever used it recommended it to others, and the demand gradually increased.

In 1877, by combined efforts the family had saved enough money to commence newspaper advertising and from that time the growth and success of the enterprise were assured, until today Lydia E. Pinkham and her Vegetable Compound have become household words everywhere, and many tons of roots and herbs are used annually in its manufacture.

Lydia E. Pinkham herself did not live to see the great success of this work. She passed to her reward years ago, but not till she had provided means for continuing her work as effectively as she could have done it herself.

During her long and eventful experience she was ever methodical in her work and she was always careful to preserve a record of every case that came to her attention. The case of every sick woman who applied to her for advice—and there were thousands—received careful study, and the details, including symptoms, treatment and results were recorded for future reference, and to-day these records, together with hundreds of thousands made since, are available to sick women the world over, and represent a vast collaboration of information regarding the treatment of woman's ills, which for authenticity and accuracy can hardly be equaled in any library in the world.

With Lydia E. Pinkham worked her daughter-in-law, the present Mrs. Pinkham. She was carefully instructed in all her hard-won knowledge, and for years she assisted her in her vast correspondence.

To her hands naturally fell the direction of the work when its originator passed away. For nearly twenty-five years she has continued it, and nothing in the work shows when the first Lydia E. Pinkham dropped her pen, and the present Mrs. Pinkham, now the mother of a large family, took it up. With women assistants, some as capable as herself, the present Mrs. Pinkham continues this great work, and probably from the office of no other person have so many women been advised how to regain health. Sick women, this advice is "Yours for Health," freely given if you only write to ask for it.

Such is the history of Lydia E. Pinkham's Vegetable Compound; made from simple roots and herbs; the one great medicine for women's ailments, and the fitting monument to the noble woman whose name it bears.
